

Personal Portfolio

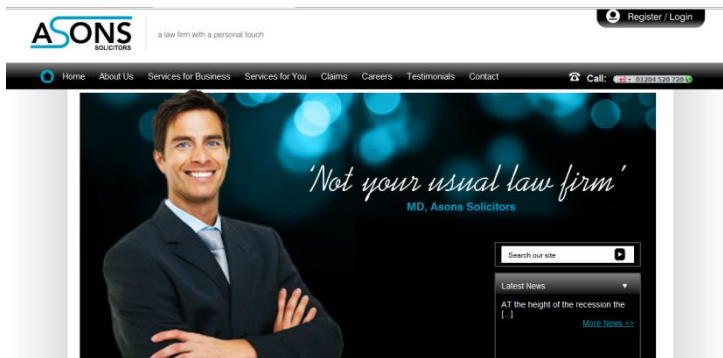

I have worked on a wide variety of web projects, encompassing static sites, Content Management Systems and E-commerce. I can work with HTML, CSS, Javascript/Jquery, PHP and MySQL. Listed below are some of my recent projects.

Simply Sharia

A Bespoke CMS system, this site incorporates videos and was described by the client as “amazing”. Its clean design makes it easily accessible and the backend has been tailored to the needs of the client.

www.simplysharia.com

Asons Solicitors

A full CMS site written in PHP for the Award-winning Asons Solicitors. This site uses Javascript to create a fresh look on the homepage, and comes with a Bespoke backend branded to the needs of the Client.

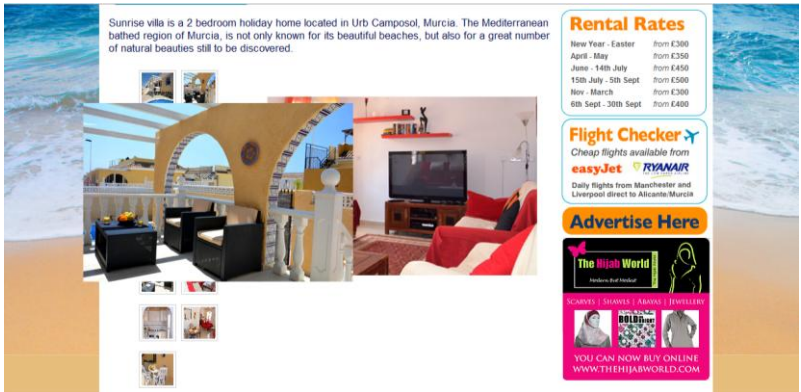

www.asons.co.uk

Alpha Auto

This site uses XML to incorporate the client's Ebay page within the website. This enables potential customers to see what items are in stock, and then click through to the Ebay page in order to make a purchase. It also includes an enquiry form.

www.aautoparts.co.uk

Sunrise Villa

A brochure site for a holiday Villa, this site contains an innovative “photo-shuffle” gallery, along with online availability checker and enquiry form.

www.sunrisevillaspain.co.uk

The Crown And Thistle

Created for a Traditional Pub and Restaurant, this site contains an animated banner, along with downloadable menus and a “Specials” page.

www.thecrownandthistle.co.uk

Cater King (e-commerce)

A full online shopping site for a catering company including categories, analytics, voucher codes and newsletters. This site is built on the Magento template and uses a combination of HTML, JavaScript and PHP to meet the client’s specification.
